Dear Property Owner:

Smoke detectors save lives!

The current Oxford Property Maintenance Code requires a photoelectric smoke detector in each bedroom and a photoelectric smoke detector outside of each sleeping area. Also, it requires a photoelectric and ionization smoke detector on each level of the dwelling unit. This may be a combined one or two separate ones (photoelectric and ionization).

Please make certain you meet this requirement at each of your rental properties. Also, let the City of Oxford or NIC (the City's property inspection contractor) know if you have any questions on this important fire safety requirement.

Thank you,

A handwritten signature in black ink that reads "Jung-Han Chen". The signature is fluid and cursive, with the first name "Jung-Han" and the last name "Chen" clearly distinguishable.
