Request for Proposals

The City of Oxford, Ohio ("City") is seeking qualified firms to provide design-build proposals for the design and construction of an approximately 30 kW-AC Solar PV System to be located at 922 Tollgate Drive, Oxford, OH 45056. Design-Builder shall be responsible for furnishing engineering and construction services for the satisfactory completion of the project.

The cost of the work shall include all fees, materials, fixed equipment, labor and services necessary, including design and engineering, to provide the construction required by the contract. The selected firm must support the City in maximizing and applying for the Federal Investment Tax Credit (ITC), as well as maintain compliance with Foreign Entity of Concern Restrictions.

Project Background

The City is committed to carbon neutral energy by 2045. To meet this goal, the City is seeking qualified solar photovoltaic providers to design and build a ~30 kW-AC, rooftop, behind the meter solar PV system at the City's Senior Center located at 922 Tollgate Drive in Oxford, Ohio ("Project").

The City would prefer the system and inverters to be storage-ready, so that battery storage may be added in the future.

The City intends to pursue the Investment Tax Credit (ITC) and comply with Foreign Entity of Concern (FEOC) restrictions.

The Solar PV System must not interrupt center operations or damage any equipment.

Project Goals

The City expects solar to reduce the amount of purchased electricity, therefore reducing utility costs.
